AGRICULTURE SCIENCE - BACHELOR OF

BAgSc

Program Office: 403.382.6991 • agsciences@lethbridgecollege.ca

Be ready to grow in a one-of-a-kind degree program, where you'll receive a unique agriculture education that combines the fundamentals of plant and soil science, the reality of growing-condition variation, and the application of modern precision agriculture techniques.

As a student, you'll gain an in-depth understanding of plant physiology, soil fertility, crop production and integrated pest management, setting the stage for an understanding of successful crop production. You'll learn about the effects of topography and crop nutrient variability and understand challenges like weeds, pests and water availability. Graduates of the program will be welcomed as members at agriculture companies, at equipment dealerships and as agronomy consultants.

Your Investment

Program fees will vary. To view fee information for your program, go to www.lethbridgecollege.ca/programs (https://lethbridgecollege.ca/programs/) and select your program (agriculture-science-bachelor)

Graduation

Upon successful completion of all program requirements, students are awarded a Bachelor of Agriculture Science degree.
